EXPERIENCE

Sabbatical / Relocation | Berlin

May 2025 – Current

- Relocated to Berlin for family reunification.
- Holds a valid German residence permit with work authorisation.

Adesso SE | Istanbul

Senior Software Developer

March 2024 – April 2025

- Architected and led implementation of scalable microservices using DDD and API-first principles to modernize enterprise systems.
- Owned API contracts (OpenAPI/Swagger) and integration patterns; ensured reliable orchestration across services.
- Improved platform resiliency with a reusable retry framework and implemented containerized integration tests (Spring Testcontainers, PostgreSQL, Flyway).

Lead Java Developer

June 2022 – March 2023

- Led an 8-engineer backend team: set technical roadmap, enforced architecture decisions and coached engineers on software craftsmanship.
- Introduced modular OO patterns and observability practices (monitoring & logging), improving operability and incident response.

Freelance Consultant | Istanbul

Senior Backend & Fullstack Software Developer

July 2020 – August 2024

- TEB Bank / Amaris Consulting: Modernized loan and credit-card platforms; refactored legacy Java systems and improved CI/CD and test automation.
- Garanti BBVA Bank: Built treasury and derivatives dashboards. Developed Swift Transactions web & mobile screens on Ark Framework with full test coverage. First Ark Framework rollout in the bank, later used as a reference project.
- Turkcell Technology: Implemented subscription backend and integrations for Nvidia GeForce Now / GamePlus, using a Kafka-based event-driven architecture that scaled to 100K+ active users.
- Japan Tobacco International: Designed and implemented a CMS and backend infrastructure using React for a loyalty management system.
- Additional freelance projects (2020–2024) in telecom, insurance, and e-commerce using Java / Spring Boot / Kafka.

BNP Paribas Cardif | Istanbul

April 2017 – August 2020

- Delivered Spring Boot microservices and batch automation for e-branch and call-center systems.
- Implemented commission and bonus calculation logic (Java EE, Oracle PL/SQL).

EDUCATION

MSc. Engineering Management

Galatasaray University

May 2017 - July 2018

- Thesis: Implementation of Operational Customer Relationship Management in Insurance Companies

BSc. Computer Engineering

Bahcesehir University

Sep 2011 – Feb. 2015

- Thesis: Implementation of RSA Algorithm on C as 512 bits and Complexity
- Full scholarship

SUMMARY

Senior Software Developer with 8+ years of experience designing and developing scalable backend systems using Java and Spring Boot.

Specialized in building enterprise-grade applications with a focus on microservices architecture, clean code, and cloud-native deployment.

Experienced across all phases of the software lifecycle, delivering production-ready systems within Agile, cross-functional environments.

SKILLS

- Backend & Architecture
- Java 17 / Spring Boot 3 / Spring Cloud / Kafka / Spring Security / Microservices / RabbitMQ / gRPC / GraphQL / Hibernate (JPA) / Hazelcast / Redis / REST APIs
- DevOps & Cloud
- Docker / Kubernetes / Terraform / Helm / Jenkins / AWS (ECS · S3 · CloudWatch) / Azure / GCP / GitHub Actions / CI/CD Pipelines / OpenShift / HashiCorp
- Testing & Quality
- JUnit 5 / Mockito / Testcontainers / SonarQube / TDD / Jacoco / Cucumber (BDD)
- Observability & Monitoring
- Grafana / Prometheus / ELK Stack / Sentry / OpenTelemetry
- Databases & Frontend
- PostgreSQL / MongoDB / Oracle PL/SQL / MySQL / Flyway / Liquibase / React / TypeScript / PrimeFaces

LANGUAGES

|         |        |
